

DARA
SANITARY WARE

Today, the use of sanitary ware plays an important role in our life, and we all use these products in different places every day. Dara Trading Company is one of the largest exporters of sanitary ware in the Middle East. And offers all kinds of sanitary ware globally using experienced specialists, modern technology, world standards and with the least water consumption.

○ Products of Dara Trading Company:

This company offers a variety of one-piece, two-piece, wall-hung or wall-mounted toilets

○ One-piece toilet:

This product is made of the highest quality raw materials, the highest quality glaze, and the best design. The quality and the unique beauty of this product has attracted customers globally. One-piece toilets are equipped with various drainage systems such as turbojet, super jet, waterjet, and waterfall. They also have a two-stroke flushing system, sliding door and floor outlet, which are produced in various sizes and dimensions.

○ Two-piece toilet:

The tank and the bowl of the toilets are separate. The water tank is installed with bolts and the frame must be pressed twice to empty it completely. This product is equipped with a washer drain system, a soft close toilet seat, a two-stroke flushing system, and a syphon outlet made of foam, which is an antibacterial glaze. The two-piece toilet is produced in various dimensions and sizes.

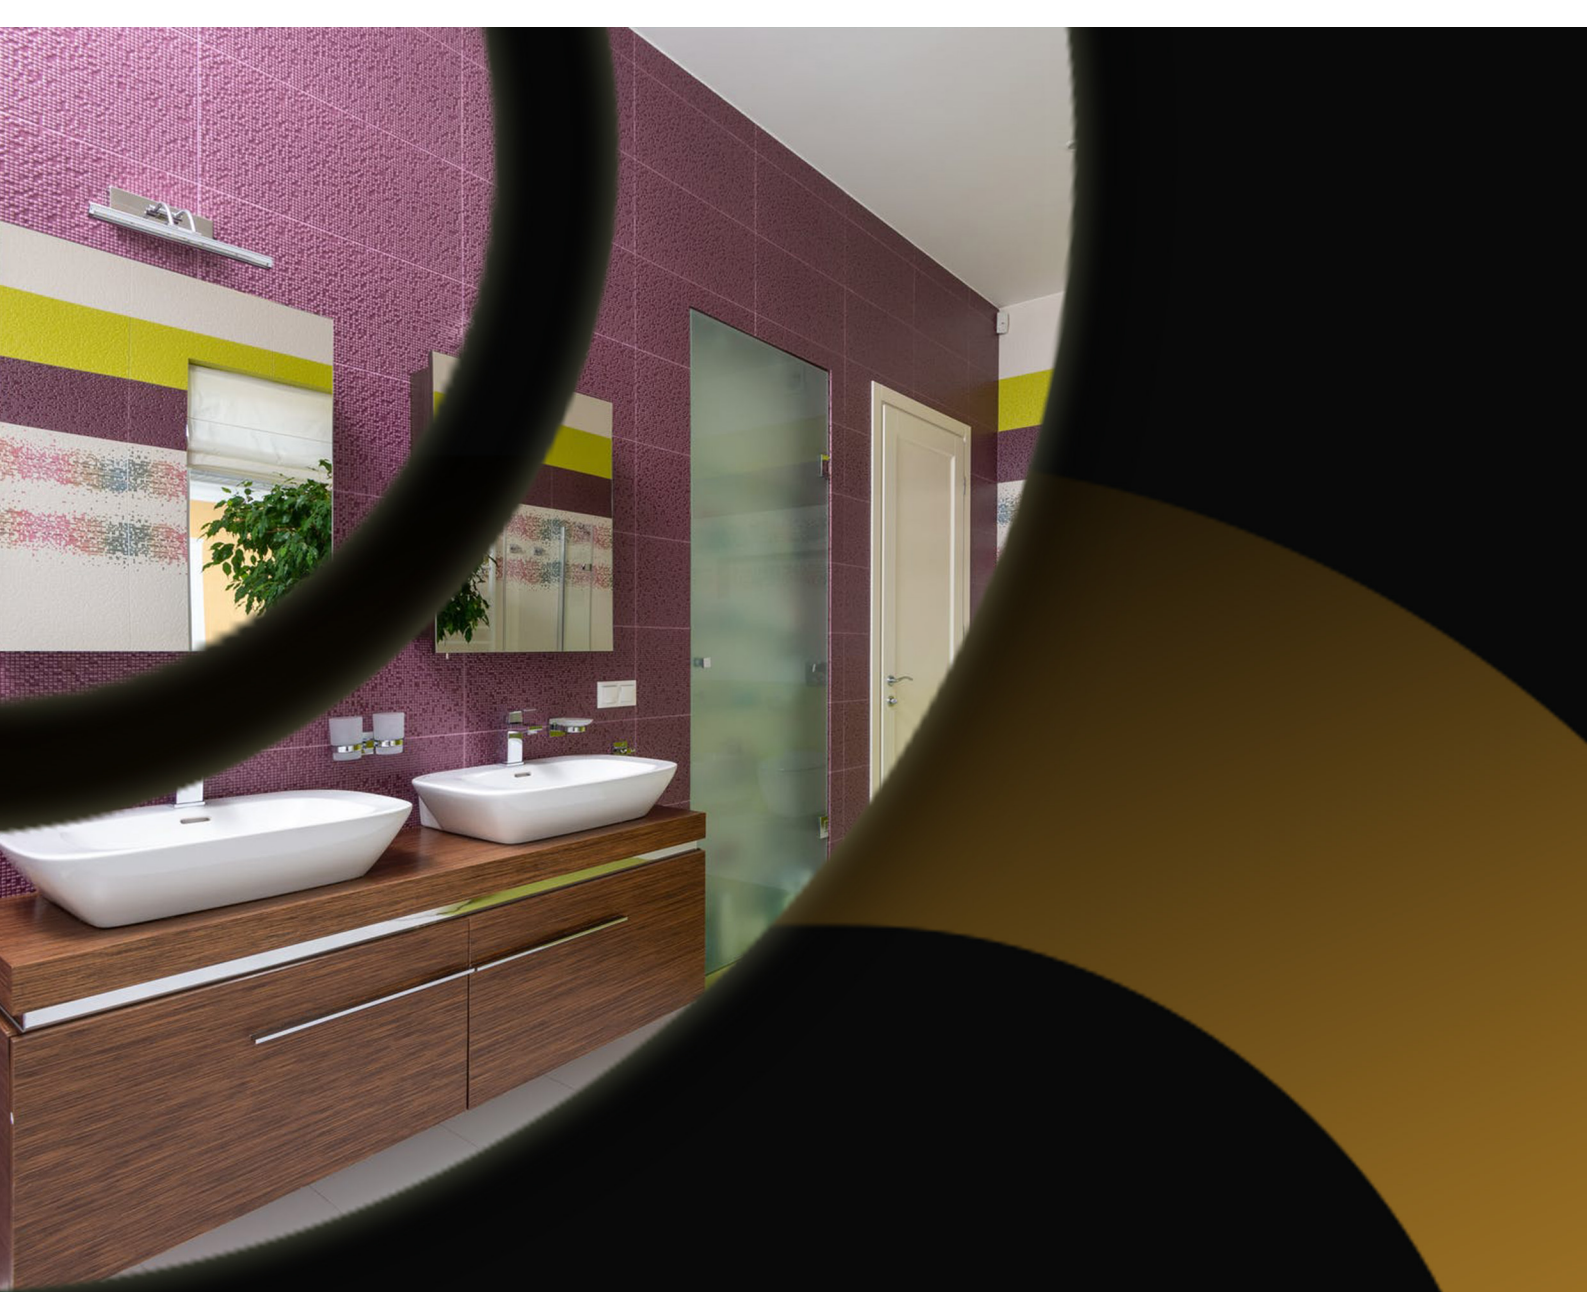

○ Wall-hung toilet or wall mounted toilet:

These toilets are very popular due to their modern design and unique beauty. This product is hung on the wall and all its parts are installed inside the wall; the Wall-hung toilet is emptied by a syphon with the keys mounted on the wall behind the head. This type of toilet uses a washdown or syphon drain model and has attracted many customers due to the capability to be installed in a variety of toilets and bathrooms, affordable price, easy maintenance, and less draining noise.

○ Different types of Asian toilets:

toilets stone glaze is one of the factors that have a significant impact on the quality of the Asian toilet. hygienically, glossy toilet stone is very suitable since its absorption rate is lower and this factor leads to less accumulation of polluted water and germs on the stone.

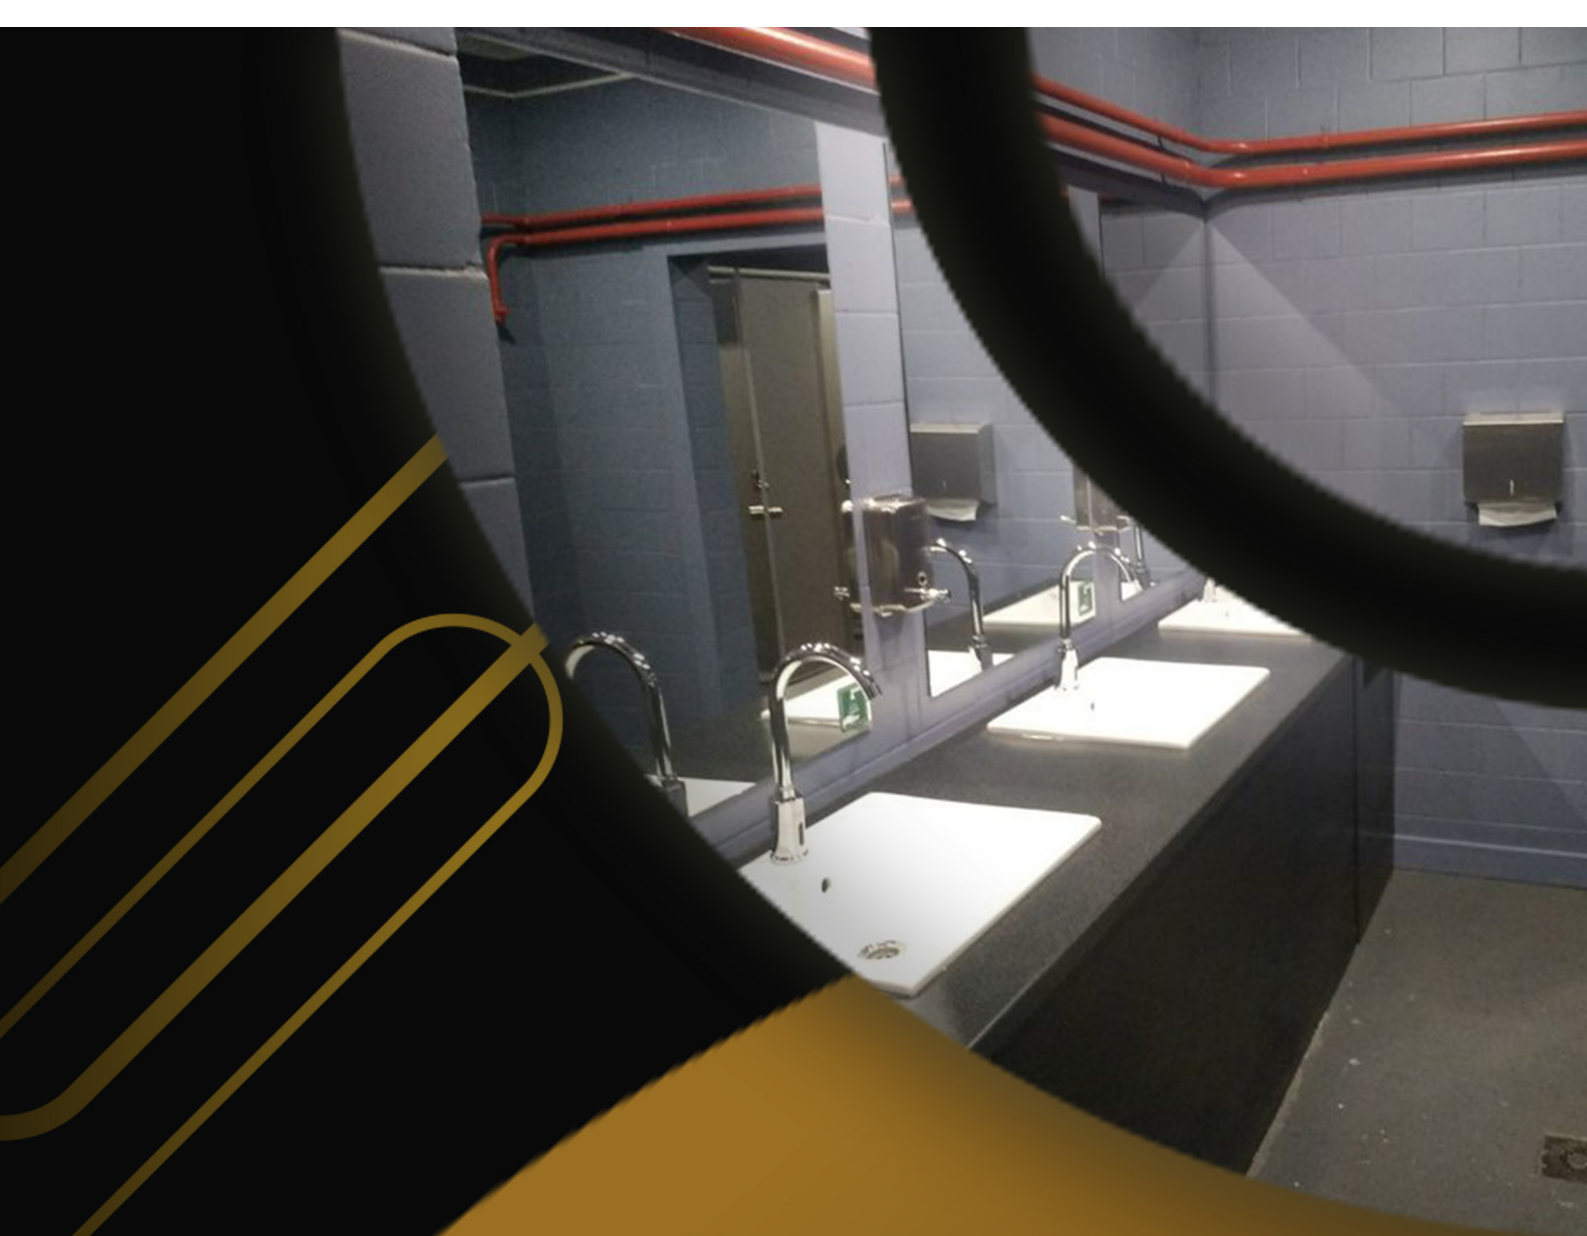

● Flat squat Toilet:

This type of product has a smooth and glossy surface with the stone in the same direction and is made of very high-quality glaze. The simple design and affordable price of this product has made it popular globally. This product is waterproof and prevents stains. Dara Trading Company offers different types of squat toilets, including flat and medical toilets.

● Asian medical toilet;

This type of product is made of first-class glaze and the best design. The sloping part of the foot makes it very easy to use and prevents direct pressure on the back and legs.

- Different types of wash-stand sinks:

This company has a variety of wash-stand sinks, including edged wash-stands, legged, bowl, Incorporated, edgeless, counter-top, wall-mounted, and wash-stands with cabinet in different dimensions and sizes.

- Edged wash-stand:

Edged wash-stand is designed to be located under the counter and the edge of it is slightly higher than the counter

● Legged wash-stand:

This is one of the most commonly used wash-stand sinks of Dara Trading company. This type of toilet is used when it is not possible to install pipes in the bathroom or toilet. In this case, a basic product is used to cover the pipes. In this model, the wash-stand sink is located between the sink and the floor and all the pipes are hidden inside it.

● Bowl wash-stand:

: Bowl wash-stand is one of the newest types and gives a unique beauty to your bathroom or toilet. This product is located exactly on top of the counter and can be ordered in various dimensions and sizes.

○ Incorporated wash-stand:

In this model, the counter is integrated with a sink and is of the same color and material. This product has been highly regarded by customers because it has a very beautiful and impressive design and it is very easy to clean. This product can be ordered in any size and dimensions.

○ Edgeless wash-stand:

One of the most popular models of Dara Trading Company products is its edgeless wash-stand. It is located under the counter and its edge is exactly level with the countertop. Beautiful design, product simplicity and easy cleaning are among the specifications of this wash-stand.

● Counter-top wash-stand:

it has been produced by Dara Trading Company with a modern design and unique beauty, which takes up less space compared to other wash-stand models and can be ordered in various sizes and dimensions.

● Wall-mounted wash-stand:

: This product can be installed on the wall without any need for cabinets and is very suitable for small bathrooms.

- **Wash-stand with cabinet:**

This product is one of the most popular products in the company, which is suitable for all types of bathrooms and toilets, with a modern design and high-quality cabinets, and can be ordered in various sizes based on the taste of customers.

- **Different types of wash-stands with cabinets:**

This company has a variety of shower pans with cabinets such as floor, wall, legged, sliding, and stair in various dimensions and sizes.

○ Different types of shower pans:

Dara Trading Company has a variety of strong and durable shower pans such as fixed, movable, built-in, and free standing; in round, square, rectangular, and triangular shapes in different dimensions and sizes to customers. This product is covered with a layer of glaze that makes it resistant to stroke and scratches.

○ Fixed shower pan:

shower pans are fixed and cannot be replaced unless the bathroom floor is damaged

- **Movable shower pan:**

Movable shower pans have the capability to move and re-locate the installation.

- **Free standing shower pan:**

This type of shower pan is removable and replaceable.

Built-in shower pan: In this method, the shower pan is placed below the normal level of the bathroom and it is not possible to move. Built-in shower pans prevent the transfer of water and moisture to other parts of the bathroom.

○ packaging:

This Company packages its products with plasto foam, shrunk by special machines, and offers them to customers in large cardboard boxes with a suitable design and based on transportation methods and the standard of the global market. In such a way that the quality of the products is maintained during transportation and distribution in the destination country and the goods are delivered without damage and delay. All the necessary equipment for installation is also included in the packaging
